«requirement»
Lowest cost trajectory
id = SN-AIR-01
text = The NAS shall provide a means for the airline to plan and fly each flight on the route, altitude and speed it ...

«requirement»
On schedule arrival
id = SN-AIR-02
text = The NAS shall provide a means for each flight to achieve arrival at its destination gate at its scheduled ...

«requirement»
Advance notice of constraints
id = SN-AIR-03
text = The NAS shall inform the airline of airspace and airport constraints that will delay or reroute its flights ...

«requirement» [out of study]
Airline chooses delayed flight
id = SN-AIR-04
text = The NAS shall let the airline choose which of its own flights takes a delay that the airline has been ...

«requirement»
Airline priorities in trajectory changes
id = SN-AIR-05
text = The NAS shall take the airline's priorities for a flight (fuel against time, and protected connections) into ...

«requirement» [out of study]
Airline data kept private
id = SN-AIR-06
text = The NAS shall keep the airline's commercially sensitive flight data (aircraft weight, cost index, connection ...

«requirement»
Separation assured
id = SN-ATC-01
text = The NAS shall keep every controlled aircraft separated from every other aircraft by at least the applicable ...

«requirement»
Demand within capacity
id = SN-ATC-02
text = The NAS shall keep the number of aircraft in each sector and at each airport within its declared capacity.

«requirement» [out of study]
Path known in advance
id = SN-ATC-03
text = The NAS shall make the path each controlled aircraft will fly known to its controller in advance.

«requirement»
Sustainable controller workload
id = SN-ATC-04
text = The NAS shall keep the number of control actions a sector controller must take within what one sector team ...

«requirement» [out of study]
Delay shared equitably
id = SN-ATC-05
text = The NAS shall share unavoidable delay equitably among airspace users.

«requirement» [out of study]
Captain final authority
id = SN-CRW-01
text = The NAS shall preserve the captain's final authority over the safe conduct of the flight.

«requirement» [out of study]
Phase information before phase
id = SN-CRW-02
text = The NAS shall give the flight crew the information needed for each phase of flight before that phase begins.

«requirement»
Flyable and timely instructions
id = SN-CRW-03
text = The NAS shall give the flight crew only trajectory clearances and instructions that the aircraft can fly, ...

«requirement» [out of study]
Crew may request trajectory change
id = SN-CRW-04
text = The NAS shall let the flight crew ask for a trajectory change and get an answer.

«requirement» [out of study]
Duty time limits kept
id = SN-CRW-05
text = The NAS shall keep each flight crew member within flight and duty time limits.

«requirement»
Clearances account for traffic
id = SN-CRW-06
text = The NAS shall provide the flight crew clearances that account for air traffic.

«requirement»
Crew informed of weather traffic and initiatives
id = SN-CRW-07
text = The NAS shall inform the flight crew of weather, traffic and other safety considerations.

«requirement»
Control across sectors
id = SN-CRW-08
text = The NAS shall facilitate control of the aircraft across regional sectors, coordinating controls, clearances ...

«requirement» [background]
Operating rules followed
id = SN-GOV-01
text = The NAS shall conduct every flight within the operating rules of 14 CFR and the FAA's air traffic orders.

«requirement» [out of study]
Accountable authority per decision
id = SN-GOV-02
text = The NAS shall make one identified authority accountable for each decision that changes a flight's trajectory.

«requirement» [background]
Low CO2 per flight
id = SN-ENV-01
text = The NAS shall keep the CO2 emitted by each flight as low as safety, economics and capacity allow.

«requirement» [out of study]
Noise within abatement procedures
id = SN-ENV-02
text = The NAS shall keep aircraft noise over communities near airports within the published noise abatement ...

«requirement» [out of study]
Reliable arrival departure times
id = SN-APT-01
text = The NAS shall give the airport operator arrival and departure times reliable enough to assign gates and ...

«requirement» [out of study]
Declared runway capacity used
id = SN-APT-02
text = The NAS shall use the runway capacity the airport has declared available.

«requirement» [out of study]
Short taxi queues
id = SN-APT-03
text = The NAS shall keep the time aircraft wait on taxiways with engines running as short as practical.

«requirement» [out of study]
Passengers carried without injury
id = SN-PAX-01
text = The NAS shall carry passengers without injury.

«requirement» [out of study]
Passengers arrive as sold
id = SN-PAX-02
text = The NAS shall get passengers to their destination, including connections, at the time they were sold.

«requirement» [out of study]
Known turbulence avoided
id = SN-PAX-03
text = The NAS shall avoid known turbulence where a route or altitude change allows it.

«requirement» [out of study]
Special use airspace for military
id = SN-MIL-01
text = The NAS shall give military operations sole use of special use airspace while it is scheduled active.

Circle-plus: ownership (the package or requirement on the left owns those on the right). Dashed arrow: deriveReqt, pointing from the derived requirement to its source. Grey: out of study (D-031). Lilac: background. Orange border: improved architecture (D-018).
